Preface

Evolutionary computation (EC) techniques are efficient, nature-inspired methods based on the principles of natural evolution and genetics. Due to their efficiency and simple underlying principles, these methods can be used for a diverse range of activities including problem solving, optimization, machine learning and pattern recognition. A large and continuously increasing number of researchers and professionals make use of EC techniques in various application domains. This volume presents a careful selection of relevant EC examples combined with a thorough examination of the techniques used in EC. The papers in the volume illustrate the current state of the art in the application of EC and should help and inspire researchers and professionals to develop efficient EC methods for design and problem solving.

All papers in this book were presented during EvoApplications 2010, which included a range of events on application-oriented aspects of EC. Since 1998, EvoApplications — formerly known as EvoWorkshops — has provided a unique opportunity for EC researchers to meet and discuss application aspects of EC and has been an important link between EC research and its application in a variety of domains. During these 12 years, new events have arisen, some have disappeared, while others have matured to become conferences of their own, such as EuroGP in 2000, EvoCOP in 2004, and EvoBIO in 2007. And from this year, EvoApplications has become a conference as well.

EvoApplications is part of EVO*, Europe's premier co-located events in the field of evolutionary computing. EVO* was held from the 7th to the 9th of April 2010 in the beautiful city of Istanbul, Turkey, which was European City of Culture in 2010. Evo* 2010 included, in addition to EvoApplications, EuroGP, the main European event dedicated to genetic programming; EvoCOP, the main European conference on EC in combinatorial optimization; EvoBIO, the main European conference on EC and related techniques in bioinformatics and computational biology. The proceedings for all of these events, EuroGP 2010, EvoCOP 2010 and EvoBIO 2010, are also available in the LNCS series (volumes 6021, 6022, and 6023).

Moreover, thanks to the large number of submissions received, the proceedings for EvoApplications 2010 are divided across two volumes. The present volume, which contains contributions for: EvoCOMNET, EvoENVIRONMENT, EvoFIN, EvoMUSART, and EvoTRANSLOG; and volume one (LNCS 6024), which contains contributions for: EvoCOMPLEX, EvoGAMES, EvoIASP, EvoINTELLIGENCE, EvoNUM, and EvoSTOC.

The central aim of the EVO* events is to provide researchers, as well as people from industry, students, and interested newcomers, with an opportunity to present new results, discuss current developments and applications, or just become acquainted with the world of EC. Moreover, it encourages and reinforces

possible synergies and interactions between members of all scientific communities that may benefit from EC techniques.

EvoApplications 2010 consisted of the following individual events:

- *EvoCOMNET*, the 7th European Event on the Application of Nature-Inspired Techniques for Telecommunication Networks and other Parallel and Distributed Systems
- *EvoCOMPLEX*, the 1st European Event on Evolutionary Algorithms and Complex Systems
- *EvoENVIRONMENT*, the 2nd European Event on Nature-Inspired Methods for Environmental Issues
- *EvoFIN*, the 4th European Event on Evolutionary and Natural Computation in Finance and Economics
- *EvoGAMES*, the 2nd European Event on Bio-inspired Algorithms in Games
- *EvoIASP*, the 12th European Event on Evolutionary Computation in Image Analysis and Signal Processing
- *EvoINTELLIGENCE*, the 1st European Event on Nature-Inspired Methods for Intelligent Systems
- *EvoMUSART*, the 8th European Event on Evolutionary and Biologically Inspired Music, Sound, Art and Design
- *EvoNUM*, the 3rd European Event on Bio-inspired Algorithms for Continuous Parameter Optimization
- *EvoSTOC*, the 7th European Event on Evolutionary Algorithms in Stochastic and Dynamic Environments
- *EvoTRANSLOG*, the 4th European Event on Evolutionary Computation in Transportation and Logistics

EvoCOMNET addresses the application of EC techniques to problems in distributed and connected systems such as telecommunication and computer networks, distribution and logistic networks, interpersonal and interorganizational networks, etc. To address these challenges, this event promotes the study and the application of strategies inspired by the observation of biological and evolutionary processes, that usually show the highly desirable characteristics of being distributed, adaptive, scalable, and robust.

EvoCOMPLEX covers all aspects of the interaction of evolutionary algorithms (and metaheuristics in general) with complex systems. Complex systems are ubiquitous in physics, economics, sociology, biology, computer science, and many other scientific areas. Typically, a complex system is composed of smaller aggregated components, whose interaction and interconnectedness are non-trivial. This leads to emergent properties of the system, not anticipated by its isolated components. Furthermore, when the system behavior is studied from a temporal perspective, self-organization patterns typically arise.

EvoENVIRONMENT is devoted to the use of nature-inspired methods for environmental issues. It deals with many diverse topics such as waste management, sewage treatment, control of greenhouse gas emissions, biodegradation of materials, efficient energy use, or use of renewable energies, to name but a few.

EvoFIN is the only European event specifically dedicated to the applications of EC, and related natural computing methodologies, to finance and economics. Financial environments are typically hard, being dynamic, high-dimensional, noisy and co-evolutionary. These environments serve as an interesting test bed for novel evolutionary methodologies.

EvoGAMES aims to focus the scientific developments onto computational intelligence techniques that may be of practical value for utilization in existing or future games. Recently, games, and especially video games, have become an important commercial factor within the software industry, providing an excellent test bed for the application of a wide range of computational intelligence methods.

EvoIASP, the longest-running of all EvoApplications which celebrated its 12th edition this year, has been the first international event solely dedicated to the applications of EC to image analysis and signal processing in complex domains of high industrial and social relevance.

EvoINTELLIGENCE is devoted to the use of nature-inspired methods to create all kinds of intelligent systems. The scope of the event includes evolutionary robotics, artificial life and related areas. Intelligent systems do not necessarily have to exhibit human or animal-like intelligence. Intelligent behavior can also be found in everyday devices such as a digital video recorder or handheld devices such as an MP3 player which learn from the human who is operating the device.

EvoMUSART addresses all practitioners interested in the use of EC techniques for the development of creative systems. There is a growing interest in the application of these techniques in fields such as art, music, architecture and design. The goal of this event is to bring together researchers that use EC in this context, providing an opportunity to promote, present and discuss the latest work in the area, fostering its further developments and collaboration among researchers.

EvoNUM aims at applications of bio-inspired algorithms, and cross-fertilization between these and more classical numerical optimization algorithms, to continuous optimization problems in engineering. It deals with theoretical aspects and engineering applications where continuous parameters or functions have to be optimized, in fields such as control, chemistry, agriculture, electricity, building and construction, energy, aerospace engineering, design optimization.

EvoSTOC addresses the application of EC in stochastic and dynamic environments. This includes optimization problems with changing, noisy, and/or approximated fitness functions and optimization problems that require robust solutions. These topics recently gained increasing attention in the EC community and EvoSTOC was the first event that provided a platform to present and discuss the latest research in this field.

EvoTRANSLOG deals with all aspects of the use of evolutionary computation, local search and other nature-inspired optimization and design techniques for the transportation and logistics domain. The impact of these problems on the modern economy and society has been growing steadily over the last few decades, and the event aims at design and optimization techniques such as

evolutionary computing approaches allowing the use of computer systems for systematic design, optimization, and improvement of systems in the transportation and logistics domain.

Continuing in the tradition of adapting the list of the events to the needs and demands of the researchers working in the field of evolutionary computing, EvoINTERACTION, the European Event on Interactive Evolution and Humanized Computational Intelligence, and EvoHOT, the European Event on Bio-inspired Heuristics for Design Automation, decided not to run in 2010 and will run again in 2011. Two new events were also proposed this year: EvoCOMPLEX, the First European Event on Evolutionary Algorithms and Complex Systems, and EvoINTELLIGENCE, the First European Event on Nature-Inspired Methods for Intelligent Systems.

The number of submissions to EvoApplications 2010 was once again very high, cumulating 188 entries (with respect to 133 in 2008 and 143 in 2009). The following table shows relevant statistics for EvoApplications 2010 (both short and long papers are considered in the acceptance statistics), compared with those from the 2009 edition:

Event	2010			2009		
	Submissions	Accept	Ratio	Submissions	Accept	Ratio
EvoCOMNET	17	12	71%	21	15	71%
EvoCOMPLEX	12	6	50%	-	-	-
EvoENVIRONMENT	5	4	80%	5	4	80%
EvoFIN	17	10	59%	14	8	57%
EvoGAMES	25	15	60%	15	10	67%
EvoIASP	24	15	62%	14	7	50%
EvoINTELLIGENCE	8	5	62%	-	-	-
EvoMUSART	36	16	44%	26	17	65%
EvoNUM	25	15	60%	16	9	56%
EvoSTOC	11	6	54%	11	7	64%
EvoTRANSLOG	11	5	45%	11	6	54%
Total	191	109	57%	143	91	64%

As for previous years, accepted papers were split into oral presentations and posters. However, this year, each event made their own decision on paper length for these two categories. Hence, for some events, papers in both categories are of the same length. The acceptance rate of 57.1% for EvoApplications 2010, along with the significant number of submissions, is an indicator of the high quality of the articles presented at the events, showing the liveliness of the scientific movement in the corresponding fields.

Many people have helped make EvoApplications a success. We would like to thank the following institutions:

- Computer Engineering Department of Istanbul Technical University, Turkey, for supporting the local organization
- Istanbul Technical University, Microsoft Turkey, and the Scientific and Technological Research Council of Turkey, for their patronage of the event

- Centre for Emergent Computing at Edinburgh Napier University, Scotland, for administrative help and event coordination

We want to especially acknowledge our invited speakers: Kevin Warwick (University of Reading, UK), Luigi Luca Cavalli-Sforza (Stanford School of Medicine, USA); and Günther Raidl (Vienna University of Technology, Austria) and Jens Gottlieb (SAP, Walldorf, Germany) for their special EvoCOP 10th anniversary talk.

We are also very grateful to all the people who provided local support, in particular Sanem Sariel-Talay, Şule Gündüz-Öğüdücü, Ayşegül Yayımlı, Gülşen Cebiroğlu-Eryiğit, and H. Turgut Uyar.

Even with an excellent support and location, an event like EVO* would not have been feasible without authors submitting their work, members of the Program Committees dedicating their energy in reviewing those papers, and an audience. All these people deserve our gratitude.

Finally, we are grateful to all those involved in the preparation of the event, especially Jennifer Willies for her unfaltering dedication to the coordination of the event over the years. Without her support, running such a type of conference with a large number of different organizers and different opinions would be unmanageable. Further thanks to the local organizer A. Şima (Etaner) Uyar for making the organization of such an event possible and successful. Last but surely not least, we want to specially acknowledge Stephen Dignum for his hard work as Publicity Chair of the event, and Marc Schoenauer for his continuous help in setting up and maintaining the MyReview management software.

Organization

EvoApplications 2010 was part of EVO* 2010, Europe's premier co-located events in the field of evolutionary computing, that also included the conferences EuroGP 2010, EvoCOP 2010, and EvoBIO 2010.

Organizing Committee

EvoApplications Chair:	Cecilia Di Chio, University of Strathclyde, UK
Local Chairs:	A. Şima (Etaner) Uyar, Istanbul Technical University, Turkey
Publicity Chair:	Stephen Dignum, University of Essex, UK
EvoCOMNET Co-chairs:	Gianni A. Di Caro, IDSIA, Switzerland Muddassar Farooq, National University of Computer and Emerging Sciences, Pakistan Ernesto Tarantino, Institute for High Performance Computing and Networking, Italy
EvoCOMPLEX Co-chairs:	Carlos Cotta, University of Malaga, Spain Juan J. Merelo, University of Granada, Spain
EvoENVIRONMENT Co-chairs:	Marc Ebner, University of Tübingen, Germany Neil Urquhart, Edinburgh Napier University, UK
EvoFIN Co-chairs:	Anthony Brabazon, University College Dublin, Ireland Michael O'Neill, University College Dublin, Ireland
EvoGAMES Co-chairs:	Mike Preuss, TU Dortmund University, Germany Julian Togelius, IT University of Copenhagen, Denmark Georgios N. Yannakakis, IT University of Copenhagen, Denmark
EvoIASP Chair:	Stefano Cagnoni, University of Parma, Italy

EvoINTELLIGENCE Co-chairs:	Marc Ebner, University of Tübingen, Germany Cecilia Di Chio, University of Strathclyde, UK
EvoMUSART Co-chairs:	Penousal Machado, University of Coimbra, Portugal Gary Greenfield, University of Richmond, USA
EvoNUM Co-chairs:	Anna Isabel Esparcia-Alcazar, ITI- Universidad Politécnica de Valencia, Spain Anikó Ekárt, Aston University, UK
EvoSTOC Co-chairs:	Ferrante Neri, University of Jyväskylä, Finland Chi-Keong Goh, Advanced Technology Centre Rolls-Royce, Singapore
EvoTRANSLOG Co-chairs:	Andreas Fink, Helmut-Schmidt-University Hamburg, Germany Jörn Grahl, Johannes Gutenberg University, Germany

Detection of DDoS Attacks via an Artificial Immune System-Inspired Multiobjective Evolutionary Algorithm	1
<i>Uğur Akyazı and A. Şima Uyar</i>	
Performance Evaluation of an Artificial Neural Network-Based Adaptive Antenna Array System	11
<i>Muamar Al-Bajari, Jamal M. Ahmed, and Mustafa B. Ayoob</i>	
Automatic Parameter Tuning with Metaheuristics of the AODV Routing Protocol for Vehicular Ad-Hoc Networks	21
<i>José García-Nieto and Enrique Alba</i>	
WiMAX Network Planning Using Adaptive-Population-Size Genetic Algorithm.....	31
<i>Ting Hu, Yuanzhu Peter Chen, and Wolfgang Banzhaf</i>	
Markov Chain Models for Genetic Algorithm Based Topology Control in MANETs	41
<i>Cem Şafak Şahin, Stephen Gundry, Elkin Urrea, M. Ümit Uyar, Michael Conner, Giorgio Bertoli, and Christian Pizzo</i>	
Particle Swarm Optimization for Coverage Maximization and Energy Conservation in Wireless Sensor Networks	51
<i>Nor Azlina Ab. Aziz, Ammar W. Mohammed, and Mengjie Zhang</i>	
Efficient Load Balancing for a Resilient Packet Ring Using Artificial Bee Colony.....	61
<i>Anabela Moreira Bernardino, Eugénia Moreira Bernardino, Juan Manuel Sánchez-Pérez, Juan Antonio Gómez-Pulido, and Miguel Angel Vega-Rodríguez</i>	
TCP Modification Robust to Packet Reordering in Ant Routing Networks	71
<i>Malgorzata Gadomska-Kudelska and Andrzej Pacut</i>	
Solving the Physical Impairment Aware Routing and Wavelength Assignment Problem in Optical WDM Networks Using a Tabu Search Based Hyper-Heuristic Approach.....	81
<i>Ali Keleş, A. Şima Uyar, and Ayşegül Yayımlı</i>	
A Generalized, Location-Based Model of Connections in Ad-Hoc Networks Improving the Performance of Ant Routing	91
<i>Michał Kudelski and Andrzej Pacut</i>	

Using Code Bloat to Obfuscate Evolved Network Traffic	101
<i>Patrick LaRoche, Nur Zincir-Heywood, and Malcolm I. Heywood</i>	
ABC Supported Handoff Decision Scheme Based on Population Migration	111
<i>Xingwei Wang, Hui Cheng, Peiyu Qin, Min Huang, and Lei Guo</i>	

EvoENVIRONMENT Contributions

A Hyper-Heuristic Approach for the Unit Commitment Problem	121
<i>Argun Berberoğlu and A. Şima Uyar</i>	
Application of Genetic Programming Classification in an Industrial Process Resulting in Greenhouse Gas Emission Reductions	131
<i>Marco Lotz and Sara Silva</i>	
Influence of Topology and Payload on CO ₂ Optimised Vehicle Routing	141
<i>Cathy Scott, Neil Urquhart, and Emma Hart</i>	
Start-Up Optimisation of a Combined Cycle Power Plant with Multiobjective Evolutionary Algorithms	151
<i>Ilaria Bertini, Matteo De Felice, Fabio Moretti, and Stefano Pizzuti</i>	

EvoFIN Contributions

A Study of Nature-Inspired Methods for Financial Trend Reversal Detection	161
<i>Antonia Azzini, Matteo De Felice, and Andrea G.B. Tettamanzi</i>	
Outperforming Buy-and-Hold with Evolved Technical Trading Rules: Daily, Weekly and Monthly Trading	171
<i>Dome Lohpetch and David Corne</i>	
Evolutionary Multi-stage Financial Scenario Tree Generation	182
<i>Ronald Hochreiter</i>	
Evolving Dynamic Trade Execution Strategies Using Grammatical Evolution	192
<i>Wei Cui, Anthony Brabazon, and Michael O'Neill</i>	
Modesty Is the Best Policy: Automatic Discovery of Viable Forecasting Goals in Financial Data	202
<i>Fiacca Larkin and Conor Ryan</i>	
Threshold Recurrent Reinforcement Learning Model for Automated Trading	212
<i>Dietmar Maringer and Tikhon Ramtohul</i>	

Active Portfolio Management from a Fuzzy Multi-objective Programming Perspective	222
<i>Nikos S. Thomaidis</i>	
Evolutionary Monte Carlo Based Techniques for First Passage Time Problems in Credit Risk and Other Applications in Finance	232
<i>Olena Tsviliuk, Roderick Melnik, and Di Zhang</i>	
Calibrating the Heston Model with Differential Evolution	242
<i>Manfred Gilli and Enrico Schumann</i>	
Evolving Trading Rule-Based Policies	251
<i>Robert Gregory Bradley, Anthony Brabazon, and Michael O'Neill</i>	
EvoMUSART Contributions	
Evolving Artistic Styles through Visual Dialogues	261
<i>Jae C. Oh and Edward Zajec</i>	
Graph-Based Evolution of Visual Languages	271
<i>Penousal Machado, Henrique Nunes, and Juan Romero</i>	
Refinement Techniques for Animated Evolutionary Photomosaics Using Limited Tile Collections	281
<i>Shahrul Badariah Mat Sah, Vic Ciesielski, and Daryl D'Souza</i>	
Generative Art and Evolutionary Refinement	291
<i>Gary Greenfield</i>	
Aesthetic Learning in an Interactive Evolutionary Art System	301
<i>Yang Li and Chang-Jun Hu</i>	
Comparing Aesthetic Measures for Evolutionary Art	311
<i>E. den Heijer and A.E. Eiben</i>	
The Problem with Evolutionary Art Is	321
<i>Philip Galanter</i>	
Learning to Dance through Interactive Evolution	331
<i>Greg A. Dubbin and Kenneth O. Stanley</i>	
Jive: A Generative, Interactive, Virtual, Evolutionary Music System	341
<i>Jianhua Shao, James McDermott, Michael O'Neill, and Anthony Brabazon</i>	
A Neural Network for Bass Functional Harmonization	351
<i>Roberto De Prisco, Antonio Eletto, Antonio Torre, and Rocco Zaccagnino</i>	

Combining Musical Constraints with Markov Transition Probabilities to Improve the Generation of Creative Musical Structures	361
<i>Stephen Davismoon and John Eccles</i>	
Dynamic Musical Orchestration Using Genetic Algorithms and a Spectro-Temporal Description of Musical Instruments	371
<i>Philippe Esling, Grégoire Carpentier, and Carlos Agon</i>	
Evolutionary Sound Synthesis: Rendering Spectrograms from Cellular Automata Histograms	381
<i>Jaime Serquera and Eduardo R. Miranda</i>	
Sound Agents	391
<i>Philippe Codognet and Olivier Pasquet</i>	
From Evolutionary Composition to Robotic Sonification	401
<i>Artemis Moroni and Jônatas Manzolli</i>	
Musical Composer Identification through Probabilistic and Feedforward Neural Networks	411
<i>Marimos A. Kaliakatos-Papakostas, Michael G. Epitropakis, and Michael N. Vrahatis</i>	

EvoTRANSLOG Contributions

Using an Evolutionary Algorithm to Discover Low CO ₂ Tours within a Travelling Salesman Problem	421
<i>Neil Urquhart, Cathy Scott, and Emma Hart</i>	
A Genetic Algorithm for the Traveling Salesman Problem with Pickup and Delivery Using Depot Removal and Insertion Moves	431
<i>Volkan Çınar, Temel Öncan, and Haldun Süral</i>	
Fast Approximation Heuristics for Multi-Objective Vehicle Routing Problems	441
<i>Martin Josef Geiger</i>	
Particle Swarm Optimization and an Agent-Based Algorithm for a Problem of Staff Scheduling	451
<i>Maik Günther and Volker Nissen</i>	
A Math-Heuristic for the Multi-Level Capacitated Lot Sizing Problem with Carryover	462
<i>Marco Caserta, Adriana Ramirez, and Stefan Voß</i>	
Author Index	473

Table of Contents – Part I

EvoCOMPLEX Contributions

Coevolutionary Dynamics of Interacting Species	1
<i>Marc Ebner, Richard A. Watson, and Jason Alexander</i>	
Evolving Individual Behavior in a Multi-agent Traffic Simulator	11
<i>Ernesto Sánchez, Giovanni Squillero, and Alberto Tonda</i>	
On Modeling and Evolutionary Optimization of Nonlinearly Coupled Pedestrian Interactions	21
<i>Pradyumn Kumar Shukla</i>	
Revising the Trade-off between the Number of Agents and Agent Intelligence	31
<i>Marcus Komann and Dietmar Fey</i>	
Sexual Recombination in Self-Organizing Interaction Networks	41
<i>Joshua L. Payne and Jason H. Moore</i>	
Symbiogenesis as a Mechanism for Building Complex Adaptive Systems: A Review	51
<i>Malcolm I. Heywood and Peter Lichodziejewski</i>	

EvoGAMES Contributions

Co-evolution of Optimal Agents for the Alternating Offers Bargaining Game	61
<i>Arjun Chandra, Pietro Simone Oliveto, and Xin Yao</i>	
Fuzzy Nash-Pareto Equilibrium: Concepts and Evolutionary Detection	71
<i>Dumitru Dumitrescu, Rodica Ioana Lung, Tudor Dan Mihoc, and Reka Nagy</i>	
An Evolutionary Approach for Solving the Rubik's Cube Incorporating Exact Methods	80
<i>Nail El-Sourani, Sascha Hauke, and Markus Borschbach</i>	
Evolution of Artificial Terrains for Video Games Based on Accessibility	90
<i>Miguel Frade, Francisco Fernandez de Vega, and Carlos Cotta</i>	
Evolving Behaviour Trees for the Commercial Game DEFCON	100
<i>Chong-U Lim, Robin Baumgarten, and Simon Colton</i>	

Evolving 3D Buildings for the Prototype Video Game Subversion	111
<i>Andrew Martin, Andrew Lim, Simon Colton, and Cameron Browne</i>	
Finding Better Solutions to the Mastermind Puzzle Using Evolutionary Algorithms	121
<i>Juan J. Merelo-Guervós and Thomas Philip Runarsson</i>	
Towards a Generic Framework for Automated Video Game Level Creation	131
<i>Nathan Sorenson and Philippe Pasquier</i>	
Search-Based Procedural Content Generation	141
<i>Julian Togelius, Georgios N. Yannakakis, Kenneth O. Stanley, and Cameron Browne</i>	
Evolution of Grim Trigger in Prisoner Dilemma Game with Partial Imitation	151
<i>Degang Wu, Mathis Antony, and K.Y. Szeto</i>	
Evolving a Ms. PacMan Controller Using Grammatical Evolution	161
<i>Edgar Galván-López, John Mark Swafford, Michael O'Neill, and Anthony Brabazon</i>	
Evolving Bot AI in Unreal™	171
<i>Antonio Miguel Mora, Ramón Montoya, Juan Julián Merelo, Pablo García Sánchez, Pedro Ángel Castillo, Juan Luís Jiménez Laredo, Ana Isabel Martínez, and Anna Espacia</i>	
Evolutionary Algorithm for Generation of Entertaining Shinro Logic Puzzles	181
<i>David Oranchak</i>	
Social Learning Algorithms Reaching Nash Equilibrium in Symmetric Cournot Games	191
<i>Mattheos K. Protopapas, Francesco Battaglia, and Elias B. Kosmatopoulos</i>	
Multiple Overlapping Tiles for Contextual Monte Carlo Tree Search	201
<i>Arpad Rimmel and Fabien Teytaud</i>	

EvoIASP Contributions

A CNN Based Algorithm for the Automated Segmentation of Multiple Sclerosis Lesions	211
<i>Eleonora Bilotta, Antonio Cerasa, Pietro Pantano, Aldo Quattrone, Andrea Staino, and Francesca Stramandinoli</i>	

A Hybrid Evolutionary Algorithm for Bayesian Networks Learning: An Application to Classifier Combination	221
<i>Claudio De Stefano, Francesco Fontanella, Cristina Marrocco, and Alessandra Scotto di Freca</i>	
Towards Automated Learning of Object Detectors	231
<i>Marc Ebner</i>	
Markerless Multi-view Articulated Pose Estimation Using Adaptive Hierarchical Particle Swarm Optimisation	241
<i>Spela Ivekovic, Vijay John, and Emanuele Trucco</i>	
Hand Posture Recognition Using Real-Time Artificial Evolution	251
<i>Benoit Kaufmann, Jean Louchet, and Evelyne Lutton</i>	
Comparing Cellular and Panmictic Genetic Algorithms for Real-Time Object Detection	261
<i>Jesús Martínez-Gómez, José Antonio Gámez, and Ismael García-Varea</i>	
Bloat Free Genetic Programming versus Classification Trees for Identification of Burned Areas in Satellite Imagery	272
<i>Sara Silva, Maria J. Vasconcelos, and Joana B. Melo</i>	
Genetic Algorithms for Training Data and Polynomial Optimization in Colorimetric Characterization of Scanners	282
<i>Leonardo Vanneschi, Mauro Castelli, Simone Bianco, and Raimondo Schettini</i>	
New Genetic Operators in the Fly Algorithm: Application to Medical PET Image Reconstruction	292
<i>Franck Patrick Vidal, Jean Louchet, Jean-Marie Rocchisani, and Évelyne Lutton</i>	
Chaotic Hybrid Algorithm and Its Application in Circle Detection	302
<i>Chun-Ho Wu, Na Dong, Wai-Hung Ip, Ching-Yuen Chan, Kei-Leung Yung, and Zeng-Qiang Chen</i>	
Content-Based Image Retrieval of Skin Lesions by Evolutionary Feature Synthesis	312
<i>Lucia Ballerini, Xiang Li, Robert B. Fisher, Ben Aldridge, and Jonathan Rees</i>	
An Evolutionary Method for Model-Based Automatic Segmentation of Lower Abdomen CT Images for Radiotherapy Planning	320
<i>Vitoantonio Bevilacqua, Giuseppe Mastronardi, and Alessandro Piazzolla</i>	
Evolution of Communicating Individuals	328
<i>Leonardo Bocchi, Sara Lapi, and Lucia Ballerini</i>	

Dynamic Data Clustering Using Stochastic Approximation Driven Multi-Dimensional Particle Swarm Optimization	336
<i>Serkan Kiranyaz, Turker Ince, and Moncef Gabbouj</i>	
Automatic Synthesis of Associative Memories through Genetic Programming: A First Co-evolutionary Approach	344
<i>Juan Villegas-Cortez, Gustavo Olague, Carlos Aviles, Humberto Sossa, and Andres Ferreyra</i>	

EvoINTELLIGENCE Contributions

A Comparative Study between Genetic Algorithm and Genetic Programming Based Gait Generation Methods for Quadruped Robots	352
<i>Kisung Seo and Soohwan Hyun</i>	
Markerless Localization for Blind Users Using Computer Vision and Particle Swarm Optimization	361
<i>Hashem Tamimi and Anas Sharabati</i>	
Particle Swarm Optimization for Feature Selection in Speaker Verification	371
<i>Shahla Nemati and Mohammad Ehsan Basiri</i>	
Scale- and Rotation-Robust Genetic Programming-Based Corner Detectors	381
<i>Kisung Seo and Youngkyun Kim</i>	
Self-organized and Evolvable Cognitive Architecture for Intelligent Agents and Multi-Agent Systems	392
<i>Oscar Javier Romero López</i>	

EvoNUM Contributions

Investigating the Local-Meta-Model CMA-ES for Large Population Sizes	402
<i>Zyed Bouzarkouna, Anne Auger, and Didier Yu Ding</i>	
Exploiting Evolution for an Adaptive Drift-Robust Classifier in Chemical Sensing	412
<i>Stefano Di Carlo, Matteo Falasconi, Ernesto Sánchez, Alberto Scionti, Giovanni Squillero, and Alberto Tonda</i>	
Automatically Modeling Hybrid Evolutionary Algorithms from Past Executions	422
<i>Santiago Muelas, José-María Peña, and Antonio LaTorre</i>	

Gaussian Adaptation Revisited – An Entropic View on Covariance Matrix Adaptation	432
<i>Christian L. Müller and Ivo F. Sbalzarini</i>	
Parallel Genetic Algorithm on the CUDA Architecture	442
<i>Petr Pospichal, Jiri Jaros, and Josef Schwarz</i>	
A New Selection Ratio for Large Population Sizes	452
<i>Fabien Teytaud</i>	
Multi-Objective Probability Collectives	461
<i>Antony Waldock and David Corne</i>	
Parallel Random Injection Differential Evolution	471
<i>Matthieu Weber, Ferrante Neri, and Ville Tirronen</i>	
Effect of Spatial Locality on an Evolutionary Algorithm for Multimodal Optimization	481
<i>Ka-Chun Wong, Kwong-Sak Leung, and Man-Hon Wong</i>	
A Directed Mutation Operator for Real Coded Genetic Algorithms	491
<i>Imtiaz Korejo, Shengxiang Yang, and Changhe Li</i>	
Speedups between $\times 70$ and $\times 120$ for a Generic Local Search (Memetic) Algorithm on a Single GPGPU Chip	501
<i>Frédéric Krüger, Ogier Maitre, Santiago Jiménez, Laurent Baumes, and Pierre Collet</i>	
Advancing Model-Building for Many-Objective Optimization Estimation of Distribution Algorithms	512
<i>Luis Martí, Jesús García, Antonio Berlanga, and José M. Molina</i>	
Estimation Distribution Differential Evolution	522
<i>Ernesto Mininno and Ferrante Neri</i>	
Design of Continuous Controllers Using a Multiobjective Differential Evolution Algorithm with Spherical Pruning	532
<i>Gilberto Reynoso-Meza, Javier Sanchis, Xavier Blasco, and Miguel Martínez</i>	
Parameter Tuning of Evolutionary Algorithms: Generalist vs. Specialist	542
<i>S.K. Smit and A.E. Eiben</i>	

EvoSTOC Contributions

Memory Design for Constrained Dynamic Optimization Problems	552
<i>Hendrik Richter</i>	

Multi-population Genetic Algorithms with Immigrants Scheme for Dynamic Shortest Path Routing Problems in Mobile Ad Hoc Networks	562
<i>Hui Cheng and Shengxiang Yang</i>	
Measuring Fitness Degradation in Dynamic Optimization Problems	572
<i>Enrique Alba and Briseida Sarasola</i>	
Handling Undefined Vectors in Expensive Optimization Problems	582
<i>Yoel Tenne, Kazuhiro Izui, and Shinji Nishiwaki</i>	
Adaptive Noisy Optimization	592
<i>Philippe Rolet and Olivier Teytaud</i>	
Noise Analysis Compact Genetic Algorithm	602
<i>Ferrante Neri, Ernesto Mininno, and Tommi Kärkkäinen</i>	
Author Index	613
